Recommendation Letter for Mr. Diogo Bastos[1]
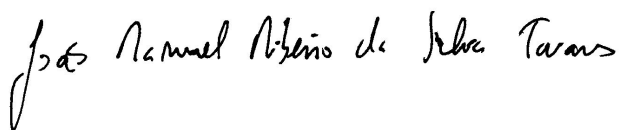

To Whom It May Concern:

It is with great pleasure that I recommend Diogo Bastos for any position or opportunity he may pursue. I had the privilege of supervising Diogo during his M.Sc. Dissertation at FEUP, titled "Gait-Based Identification from Images by Computational Techniques". This innovative work focused on deep learning and computer vision techniques and received the highest possible grade of 20/20, a unique achievement in his program.

Throughout the supervision process, Diogo demonstrated exceptional skills in technical areas such as Machine Learning, Deep Learning, and Computer Vision, as well as outstanding organizational and communication abilities. His proactivity, determination, and capacity to solve complex problems, even under pressure, were evident not only during his Dissertation but also in our collaboration on scientific publications derived from his work.

Moreover, Diogo is a dedicated professional with a collaborative spirit and a positive attitude, making him an excellent team player. His ability to quickly learn new tools and technologies, combined with academic rigor and creativity, makes him a valuable asset to any organization.

I recommend Diogo without reservation, confident that he will excel in any project or position he undertakes. I am happy to provide further details or answer any questions if needed.

Sincerely yours,

João Manuel R.S. Tavares,
Full Professor and Director of the Mechanical Engineering Department
Faculty of Engineering, University of Porto
